INNOVATION UPDATE FROM ISRAEL IDEAS

A New Arsenal in the Battle Against Cancer

Tel Aviv-based startup Alpha Tau Medical claims it has developed a technology that can cure tumors by injecting them with radioactive material that attacks and destroys the cancer cells. The procedure takes two hours or less and can be performed anywhere, the company says.

In the treatment, called Diffusing Alpha-emitters Radiation Therapy (DaRT), a needle containing radium-224, a radioactive isotope, is inserted into the location of the tumor. Once positioned, it emits alpha particles that have the capacity to exterminate the cancer cells. These particles are known to have the ability to cause irreparable breaks in the DNA of these cells. Exploring Jewish Views of the Afterlife: Traditional and Contemporary Perspectives with Dr. Simcha Raphael

Tuesdays, February 12, 26; March 12, 26

10-11:30 AM

An exploration of Jewish afterlife texts spanning three millennia of history. As travelers through time, we shall enter the worlds of Torah, Talmud, Midrash, Zohar and Hasidic tales investigating diverse ways Jews have understood the enigmatic mystery of death and the world beyond.

Searching for spiritual renewal of traditional teachings, we shall use these texts for reflection and discussion discovering practical guidelines for responding to the human encounter with death - personally, and in our families and communities.

Simcha Raphael, PhD is the Founding Director of the DA'AT Institute for Death Awareness, Advocacy and Training.
