INNOVATION UPDATE FROM Automatically Detect Medical Anomalies

Israeli startup Zebra Medical Vision, founded in 2014 by Eyal Toledano, Eyal Gura, and Elad Benjamin, uses AI to read medical scans and automatically detect anomalies. Through its innovative development and use of 11 different algorithms, Zebra Medical can identify visual symptoms for diseases such as breast cancer, osteoporosis, fatty liver, and conditions such as vertebral fractures, aneurysms, and brain bleeds.

The company will begin deploying its revolutionary medical imaging AI solutions in one of Israel's largest hospitals, Tel Aviv's Ichilov, as well as with Clalit Health Services and Maccabi Healthcare Services – Israel's largest and second-largest HMO, respectively. The three medical entities manage some 90 percent of patients in Israel, the company said.

The Guide to the Perplexed Seder Leader – How to Customize the Haggadah

The haggadah can be confusing and boring when recited, but it can be empowering when treated as a how-to manual and when one learns how to skip judiciously and supplement for variety and depth. For example, using contemporary artwork, we can engage participants in the politics and psychology of the four sons and daughters. Many handouts and copies of the author's two haggadot will be available.
