Israel at 70

The first exile – after the destruction of the first Temple – lasted for 70 years. Upon return to Israel it is exclaimed in the Psalms that our dreams had been fulfilled. This year marks the 70th anniversary of the creation of the first Jewish state in nearly 2000 years!

Come learn with us and engage in learning about the continued miracle that is Modern Israel.

All programs labeled with this icon include Israel at 70 content.

These programs are generously sponsored by the Shirley & Norman Greenbaum Yom Ha'atzmaut Fund.

INNOVATION UPDATE FROM *ISRAEL IDEAS* **Treating Alzheimer's, MS, Crohn's and More**

Could one drug effectively treat incurable inflammatory diseases such as Crohn's disease, ulcerative colitis, rheumatoid arthritis and multiple sclerosis, as well as neurodegenerative maladies such as Alzheimer's disease?

Yes, says Professor David Naor of the Hebrew University Hadassah Medical School. All these diseases, he explains, are associated with pathological amyloid proteins that could be neutralized by the 5-mer peptide Naor has spent the last 10 years researching and developing with the support of the university's Yissum technology-transfer company, the Israeli government, and Spherium Biomed of Spain.
