Part 2: History of Jewish Philadelphia: Jewish Neighborhoods in Philadelphia

In this series, we will trace the patterns of migration of the children of Jewish immigrants as they moved out of South Philadelphia toward Strawberry Mansion, West Philly, Wynnefield, and Logan. Then we will delve into the “Third Settlement”- neighborhoods close to the edge of the city that were built up after the second World War, and the Jewish communities that formed in West Oak Lane, Northeast Philadelphia, and more. Jews moved slowly to the suburbs in Philadelphia, only settling in Cheltenham and parts of Lower Merion in significant numbers before 1970. We’ll look at the evolution of these communities, and then finish with a discussion of the new realities of outer ring suburbanization, resettlement of the city, and the impact of immigration from the former Soviet Union, the resurgence of Orthodox Judaism, and Jewish rise to prominence in politics and philanthropy. We will also devote a session to the history of Jewish Education in Philadelphia.

Honor Your Father and Your Mother: Caring for Sick or Elderly Parents

As our parents age, most of us find ourselves in the position of providing extensive care. This loving care dominates and characterizes a portion of our lives – it is both a tremendous privilege and a daunting challenge. Rabbinic literature describes caring for sick and aging parents as the most difficult mitzvah to fulfill. Join us to discuss how Judaism presents this mitzvah and encourages dedication and tenderness toward parents as well as sensitivity toward caregivers.

INNOVATION UPDATE FROM *ISRAEL IDEAS*

Helping Develop Better Drugs

The world of pharmaceutical drug development and discovery is notoriously complex, expensive, and slow-moving. It can take billions of dollars and between a decade or two from the research and development stage to market approval. And rightly so. After all, human lives are at stake. But imagine if you could feed data about a new pharmaceutical drug into a machine learning approach that can then tell you which patients with which diseases will respond to the drug – all without having to run large-scale clinical trials?

Can you provide an occasional ride?

What areas would be convenient for you? What Services, meetings, or programs do you usually attend (morning/afternoon/evening)?
