**THIS SUMMER – GIVE A D'VAR TORAH AT SHABBAT SERVICES...**

Why are Bar/Bat Mitzvah students the only Har Zion Temple members who share thoughts on the weekly Torah portion or Haftarah with the community? Each Shabbat, **through August 26-27**, we encourage all of our members to step forward and prepare three to five minutes of Torah or Haftarah commentary to present at Friday night or Saturday morning services. Please contact Rabbi Allen ruallen@harziontemple.org to select a date. All of our clergy are more than ready to help you prepare and present your D'var Torah. It is a wonderful opportunity to grow Jewishly, and the congregation looks forward to hearing your insights.

## INNOVATION UPDATE FROM Make Any Fabric Antibacterial, Preventing Infections

The Israel-based company Nano Textile has developed a technology that can transform any fabric into one that kills bacteria. Bacterial infections acquired during hospitalization are a major cause of illness and death. The World Health Organization has estimated that over 500 million people worldwide are infected during hospitalization, a high percentage of which are caused by highly resistant bacteria, such as Methicillin-resistant Staphylococcus aureus (MRSA). These infections not only take a toll of approximately 14 million lives worldwide per year, but also pose a significant financial burden by increasing hospitalization by eight days on average per affected patient. Data provided by Nano Textile indicates that hospital-related costs in Europe alone are estimated at \$12 billion per year.

The cost-effective technology permanently prevents the growth of bacteria on both natural and synthetic fibers, can prevent the spread of hospital-acquired infections, and can reduce cross contamination between patients and medical staff, helping reduce secondary infections. Any ready-made textile is transformed into an antibacterial one by embedding zinc-oxide nanoparticles onto the fabric, the company said. Nanoparticles of zinc oxide can eradicate even antibiotic resistant bacteria such as MRSA, per the company. Zinc oxide is known for its antibacterial properties and has been approved by the FDA as safe. To read more go to: <http://www.israelideas.org/#!current/c1gqf>.
