**INNOVATION UPDATE FROM** *Israel Ideas*

***Looking For The Skin's Fountain Of Youth***

Pollutants, UV rays, radiation and other stressors in the environment assault our skin all day long. When these substances filter into the body through our pores, they can create free radicals. Oxidative stress caused by excessive free radicals is responsible for a host of skin conditions, including inflammatory diseases, pigment disorders, wrinkles and some types of skin cancer. It can also damage internal organs and cells that produce essential lipids, proteins and DNA. According to report in the journal *Cosmetics*, an Israeli PHD student in collaboration with researchers from Technion-Israel Institute of Technology came up with an innovative nanotechnology that could be the way to activate the body's natural defense against oxidative damage to the skin as well as internal organs. This nanotechnology boosts the body's natural defense mechanisms against oxidative stress, helping to produce antioxidant enzymes to maintain the skin's proper balance.

"The approach of using the body's own defense system is very effective. We showed that activation of the body's defense system with the aid of a unique delivery system is feasible, and may leverage dermal cure," said Hebrew University researcher Maya Ben-Yehuda Greenwald.
