New Procedures for the Mi Shebeirach List

In an effort to better serve the needs of our congregation, we are changing the way we maintain and update our Mi Shebeirach list (the list of people who have requested prayers for healing). To make sure our list is as current as possible, we are building a new list from scratch. Even if you have previously asked that a name be placed on this list, we ask that you contact Laurie and request that person's name be included on the list. Moving forward, names will be kept on the list for four weeks and then removed unless you, or a member of our Clergy specifically request that they remain longer. To have a name added to the list or to update the status of the person named, please call or email Laurie Albert in the Clergy office at 610-667-5000 x111 or lalbert@harziontemple.org.

Learning Wisdom from the Gentiles – Benjamin Franklin's Impact on the Mussar Movement with Dr. Josh Kulp

Monday September 25, 6:30-8 PM – Open to the community

Dr. Joshua Kulp is the Rosh Yeshiva of the Conservative Yeshiva in Jerusalem, located in the Fuchsberg Center of the United Synagogue of Conservative Judaism. He is the author of Reconstructing the Talmud and The Schechter Haggadah, and writes the material for the CY's Daf Shevui and Mishnah Yomit programs. During the summer he is Rosh Bet Midrash at Camp Ramah in New England. Dr. Kulp is originally from Margate, New Jersey and lives in Modiin, Israel with his wife and four kids. During his spare time he is a runner, tri-athlete and craft beer aficionado.

INNOVATION UPDATE FROM ISRAEL IDEAS

How One Little Sensor Can Make Your Life Better

How did an Israeli startup evolve from using radio frequency (RF) technology intended to detect breast cancer to creating palm-sized devices that can monitor passengers in self-driving cars? That's the story of Vayyar Imaging, which is building a multi-purpose sensor with real-life uses that sound straight out of science fiction. Vayyar's three cofounders – Raviv Melamed, Miri Ratner and Naftali Chayat – discovered in 2011 that each had a family member suffering from cancer. They set out to make a difference. The product they built was a thumb-sized sensor with 24 built-in radio frequency (RF) antennas. RF signals can penetrate anything from human tissue to concrete walls. Because objects made of differing materials absorb the RF signals at varying rates, some signals go straight through an object while others bounce back at distinctive strengths, creating what Vayyar head of marketing Malcolm Berman describes as "a reflection." Vayyar then uses its many antennas to stitch those reflections into a 3D image. To read more, go to: <http://www.israelideas.org/#!current/c1gqf>.
